Tasmanian Minerals Conference 2010

12-14 May 2010

Conference a hit Feedback from the Tasmanian Minerals Conference in Launceston this month has been good. It was a mixed program of economics, mineral exploration, mining and processing talks, along with some detail of the science which underpins the search for minerals. For next year, we may return to St Helens, the site of the first conference in the current format.

Here are some photographs from the conference -

John Peters, Senior Economist, Global Markets & Treasury, Commonwealth Bank of Australia

Dr Geoff Green, Mineral Resources Tasmania

Scott Huffadine, Bluestone Mines JV Pty Ltd
